

Project Design Phase

Problem – Solution Fit Template

Date	3 October 2026
Team ID	SWTID-2026-9693
Project Name	streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit :

Problem–Solution Fit means identifying the actual problems faced by employees and the IT/Hardware team during the Standard Laptop procurement process and ensuring that the proposed ServiceNow solution addresses those problems effectively. It helps the team understand customer behaviour, identify process gaps, and develop an automated workflow that reduces manual effort, delays, and unnecessary follow-up.

Purpose:

- ☐ **Solve procurement problems** in a way that fits the needs of employees and the IT/Hardware team.
- ☐ **Improve request processing** by using the existing ServiceNow Service Catalog and Flow Designer workflow.
- ☐ **Improve communication and transparency** by providing clear approval and request status updates.
- ☐ **Reduce frequent process issues** such as manual follow-up, delayed task creation, and incorrect task assignment.
- ☐ **Understand the existing laptop procurement process** and improve it through automated request, approval, task creation, and Hardware assignment.

Problem-Solution Fit Canvas			
Team ID: SWTID-2026-9693		Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	
Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS - Employees (requesters) who need a standard laptop for new joiners, replacements or upgrades - Managers/Approvers who approve the requests - IT/Hardware Team who process and fulfill the laptop orders - IT Admins who manage the ServiceNow platform	6. CUSTOMER CONSTRAINTS CC - Approval delays due to manual process - Lack of real-time request status visibility - Limited IT staff for handling requests - Budget and procurement policies - Dependency on correct request information - Different device requirements and availability constraints	5. AVAILABLE SOLUTIONS AS - Manual email requests to IT team - Spreadsheet/Excel-based tracking - Phone calls or direct follow-ups - Generic IT service request forms - Other procurement tools (non-integrated) - Pros: simple and familiar - Cons: no automation, delays, no tracking, higher manual effort
	2. JOBS-TO-BE-DONE / PROBLEMS J&P - Request a standard laptop for a new joiner, replacement or upgrade - Get the request approved by the manager - Provide necessary details (user, location, device type) - Track the request status - Ensure timely delivery of the laptop - Reduce manual follow-ups with IT team	9. PROBLEM ROOT CAUSE RC - Manual and non-standardized request process - No automated approval workflow - Delayed task creation and assignment - Incomplete or incorrect request information - Lack of real-time tracking and notifications - High dependency on emails and manual follow-ups - No centralized system for procurement tracking	7. BEHAVIOUR BE - Employees send email or raise informal requests - Follow up with manager and IT team for status - Provide missing information when requested - Check status frequently (email/phone/in person) - IT team manually creates and assigns tasks - Managers approve via email or outside the system
Focus on J&P, map into BE, understand RC	3. TRIGGERS TR - New employee onboarding - Existing laptop issue or hardware replacement - Performance problems with current device - Manager approval for new requirements - Budget cycle or IT hardware refresh - Company policy or compliance requirements	10. YOUR SOLUTION SL - Automated Standard Laptop request process using ServiceNow Service Catalog and Flow Designer - Predefined request form with required details - Manager approval workflow using Flow Designer - Automatic Catalog Task creation and assignment to Hardware team - Real-time status tracking and notifications - Centralized tracking of all requests - Reduced manual effort and faster processing	8. CHANNELS of BEHAVIOUR CH
	4. EMOTIONS: BEFORE / AFTER EM - Before: Frustration, uncertainty, delay, lack of visibility, repeated follow-ups - After: Convenience, transparency, faster processing, peace of mind, higher satisfaction		8.1 ONLINE - ServiceNow Service Portal (Service Catalog) - Email notifications - In-app notifications (ServiceNow) - Dashboard / My Requests 8.2 OFFLINE - Direct communication with IT/Hardware team (if required) - In-person hardware delivery - Phone support (for exceptions)
