

## Functional & Performance Testing Template

### Model Performance Test

|               |                                                                                   |
|---------------|-----------------------------------------------------------------------------------|
| Date          | 3 Octobr 2026                                                                     |
| Team ID       | SWTID-2026-9693                                                                   |
| Project Name  | streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks |                                                                                   |

### Test Scenarios & Results

| Test Case ID | Scenario (What to test)                                 | Test Steps (How to test)                         | Expected Result                                    | Actual Result                                                                             | Pass/Fail |
|--------------|---------------------------------------------------------|--------------------------------------------------|----------------------------------------------------|-------------------------------------------------------------------------------------------|-----------|
| FT-01        | Text Input Validation (e.g., topic, job title)          | Enter valid and invalid text in input fields     | Valid inputs accepted, errors for invalid inputs   |        | PASS      |
| FT-02        | Number Input Validation (e.g., word count, size, rooms) | Enter numbers within and outside the valid range | Accepts valid values, shows error for out-of-range |      | PASS      |
| FT-03        | Content Generation (e.g., blog, resume, design idea)    | Provide complete inputs and click "Generate"     | Correct content is generated based on input        |      | PASS      |
| FT-04        | API Connection Check                                    | Check if API key is correct and model responds   | API responds successfully                          |      | PASS      |
| PT-01        | Response Time Test                                      | Use a timer to check content generation time     | Should be under 3 seconds                          | Catalog Task was created successfully after approval within the expected processing time. | PASS      |

|              |                                    |                                           |                                       |                                                                                                                                 |      |
|--------------|------------------------------------|-------------------------------------------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|------|
| <b>PT-02</b> | API Speed Test                     | Send multiple API calls at the same time  | API should not slow down              | Multiple Standard Laptop requests were processed successfully and corresponding Catalog Tasks were created without duplication. | PASS |
| <b>PT-03</b> | File Upload Load Test (e.g., PDFs) | Upload multiple PDFs and check processing | Should work smoothly without crashing | Corresponding Catalog Tasks were generated successfully for the tested requests.                                                | PASS |
