

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

|               |                                                                                   |
|---------------|-----------------------------------------------------------------------------------|
| Date          | 3 October 2026                                                                    |
| Team ID       | SWTID-2026-9693                                                                   |
| Project Name  | streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks | 4 Marks                                                                           |

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)                                      |
|--------|-------------------------------|-------------------------------------------------------------------------|
| FR-1   | Standard Laptop Request       | User selects Standard Laptop from Service Catalog                       |
| FR-2   | Request Approval              | Request is sent to the approver for approval                            |
| FR-3   | Automated Task Creation       | Flow Designer automatically creates a Catalog Task after approval       |
| FR-4   | Hardware Assignment           | Catalog Task is automatically assigned to the Hardware assignment group |
| FR-5   | Task Details                  | Short description and task description are automatically populated      |
| FR-6   | Request Tracking              | User and IT team can track the request/task status                      |

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description                                                            |
|--------|----------------------------|------------------------------------------------------------------------|
| NFR-1  | Usability                  | Simple and easy-to-use Service Catalog request process                 |
| NFR-2  | Security                   | Role-based access and ServiceNow access controls                       |
| NFR-3  | Reliability                | Approved requests should consistently trigger the required workflow    |
| NFR-4  | Performance                | Automation should reduce manual processing time                        |
| NFR-5  | Availability               | Application should be accessible through the ServiceNow cloud platform |
| NFR-6  | Scalability                | Workflow should support multiple laptop requests and users             |
